WHY GO DIGITAL?

With around 80% of businesses having an online presence, there's a huge need for digital marketing experts. However, around 67% of the current marketing workforce lacks digital marketing, data and analytic skills. As more and more businesses become technologically advanced, the skill gap will only widen which leaves a huge opportunity for young students to learn digital marketing skills. General marketers, small business owners, entrepreneurs and other job seekers can also use this opportunity to make advances in their respective careers.

TESTIMONIALS

EMILY WATSON

“

I've been building websites for years, but I had no idea how to get the traffic I needed to make them profitable. I tried all of the "tools" out there, but none of them taught me how to actually use those tools in a way that would help me grow my business.

Then I took Chai's digital marketing course and learned exactly how to strategize my campaigns and implement them—and now my website is getting more traffic than ever before!

”

“

I can't say enough good things about Chai. I've been his student for a few years, and he has helped me grow as an entrepreneur in so many ways.

When I first started working with him, I didn't know anything about marketing or how to use social media to my advantage. But now I grew into someone who not only knows how to set up a Facebook ad or create an Instagram post that gets engagement—I also have strategies for growing my business overall!

Chai is great at teaching people how to think strategically about their businesses as well as teaching them specific skills. She brings in real-life examples from her own experience and makes sure that everything she teaches is actionable so you can take what you learn right away and apply it to your own business.
